- Global health and animal health systems
- Biodiversity in the Mesopotamian Marshlands
- Climate change and environmental sustainability
- Artificial intelligence and data science
- Social and cultural studies
- Education and pedagogy

3 RESEARCH CENTERS

05 · DISTINCTIVE IDENTITY

Why -Shatrah?

The University of Al-Shatrah draws distinction from its geographic setting, environmental context, and cultural depth. Its location in Dhi Qar places it close to the Iraqi Marshlands and within the broader historical landscape of ancient Mesopotamia.

1

Iraqi Marshlands

A globally significant wetland ecosystem offering opportunities for biodiversity research, environmental studies, and climate resilience.

2

Mesopotamian Heritage

The University operates in a region deeply linked to Sumerian civilization, cultural memory, and southern Iraqi heritage.

3

Veterinary & Scientific Relevance

The regional context supports academic work in animal health, livestock systems, zoonotic disease, and applied sciences.

4

Community Impact

The University aims to contribute to sustainable local development through education, research, and community-oriented engagement.

06 · INTERNATIONAL

Toward Global Engagement

The University of Al-Shatrah is in the early stages of internationalization and is actively seeking to establish partnerships with European and regional universities. The institution views collaboration as essential to academic growth, mobility, and shared research impact.

AREAS OF INTEREST

Priority interests include Erasmus+ mobility for students and staff, capacity building and academic training, joint workshops and conferences, and cultural and academic exchange initiatives.

COLLABORATION PRIORITIES

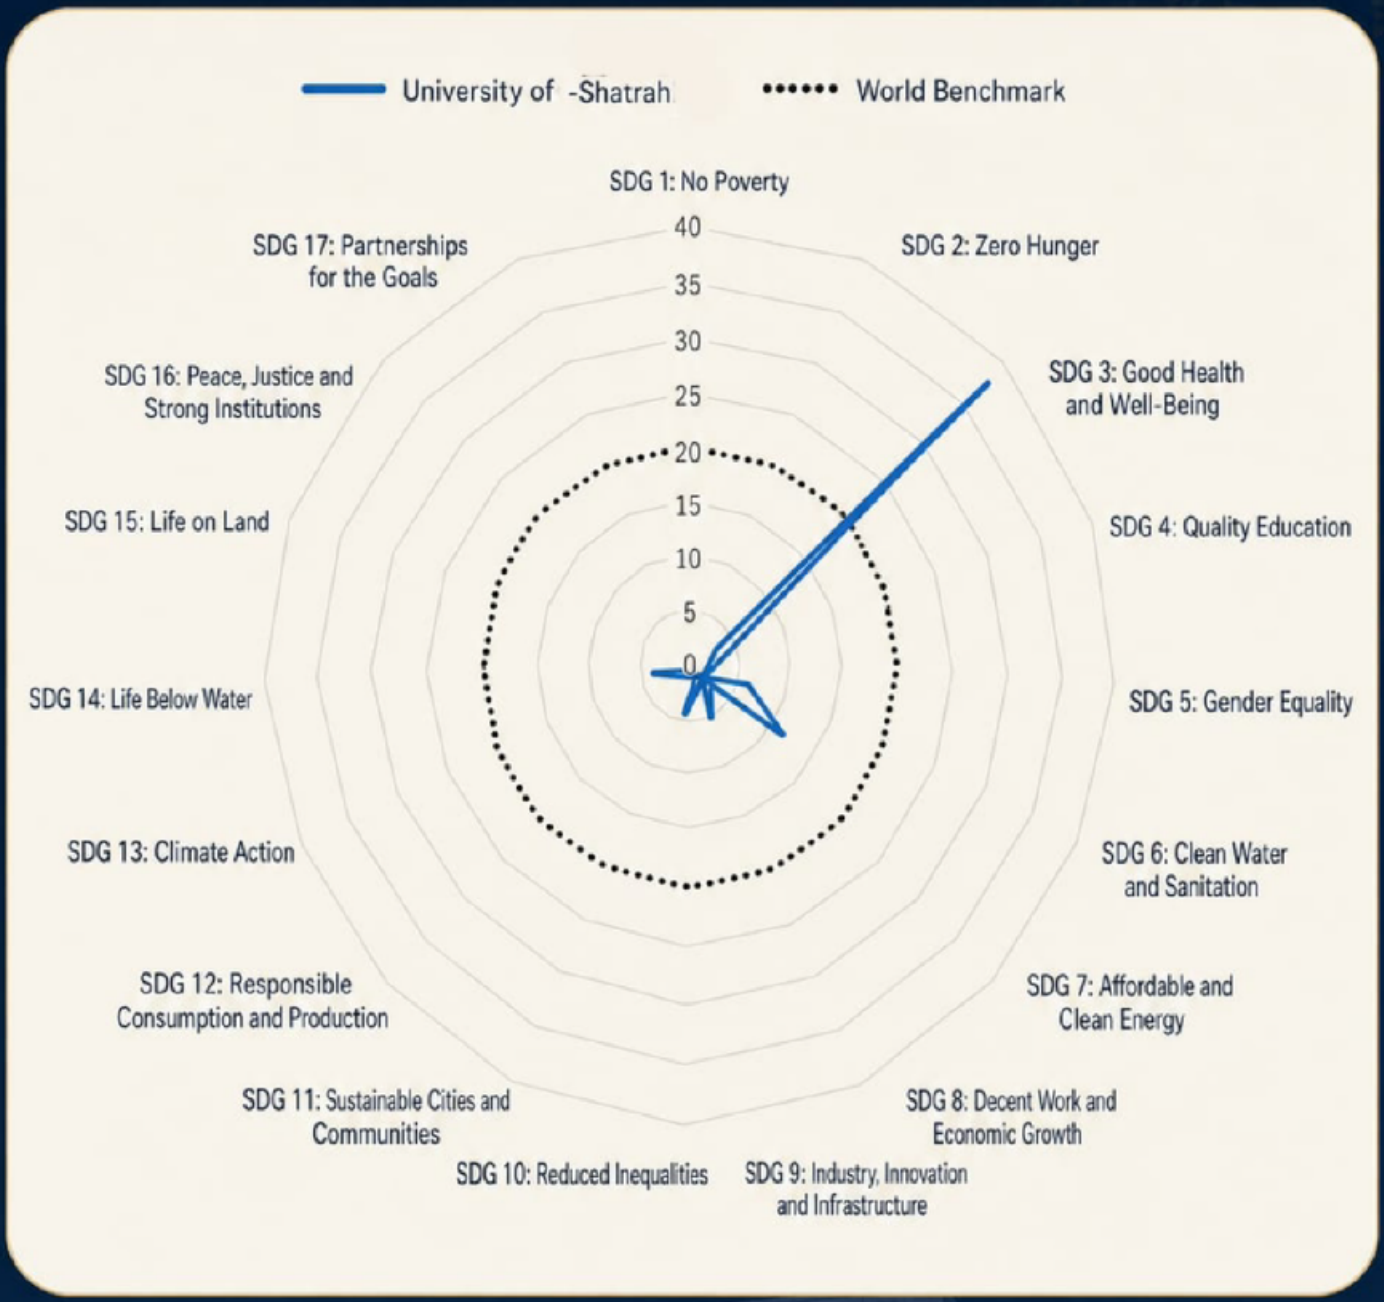

Erasmus+ Mobility	Student and staff mobility opportunities
Capacity Building	Academic development and institutional strengthening
Joint Workshops	Shared training, events, and conferences
Academic Exchange	Cultural and academic exchange initiatives
Research Collaboration	Especially in Marshlands studies, veterinary sciences, AI, education, and arts
